CAREER OBJECTIVE

Software Engineer & GenAI Developer with hands-on experience building LLM applications, NLP systems, and full-stack AI products. Skilled in Python, React, TensorFlow, Azure and cloud deployment. Currently developing scalable GenAI solutions at BGS Infotech, including RAG pipelines, AI agents, and workflow automation tools. Strong background in designing production AI systems and delivering high-performance user experiences.

EDUCATION

Visvesvaraya Technological University Bachelor of Engineering in Information Science & Technology	CGPA- 8.38/10	<i>Bangalore, India</i> 2021 – 2025
Pre-University Course (PUC). Karnataka Pre-University Board	SCORE- 83.66%	<i>Bangalore, India</i> 2019-2021
S.S.L.C (10th Grade). Karnataka Secondary Education	SCORE- 92.32%	<i>Bangalore, India</i> 2018-2019

SKILLS

- **Programming:** Python, JavaScript, TypeScript, SQL, HTML/CSS.
- **AI/ML:** TensorFlow, NLP, RAG, Generative AI, LLMs.
- **Tools & Frameworks:** React.js, Node.js, Flask.
- **Cloud & DevOps:** AWS, Microsoft Azure, Firebase, Docker.
- **Areas of Expertise:** GenAI Development, Full-Stack Engineering, AI Automation and Cloud Deploy.

WORK EXPERIENCE

GenAI Developer | BGS INFOTECH | Sep 2025 – Present | *Bangalore*

- Building GenAI-powered solutions including automated agents, RAG systems, and workflow automation tools.
- Implementing LLM-based features using Python, Azure OpenAI/GenAI services, and vector databases.
- Developing conversational AI assistants, integrating custom memory, tools, and multi-step reasoning pipelines.

Ai Intern | PRIME MINDS CONSULTANCY | Feb 2025 – May 2025 | *Bangalore*

- Built intelligent product data extraction system using NLP models for Processing Large Product Catalogs.
- Integrated LLM-based automation into internal tools, reducing manual data entry workload by **60%**.
- Built validation scripts using Python & Pandas, improving data quality consistency across teams.

Project Intern | KENNAMETAL INC. | May 2024 – Nov 2024 | *Bangalore*

- Developed computer vision solution for manufacturing quality control using image processing techniques.
- Implemented automated defect detection system that helped prevent potential quality issues.
- Worked on 2D image extraction and preprocessing techniques for manufacturing datasets.

PROJECTS

Druva – AI Intelligent Dev Companion

Tech: React, TypeScript, Vite, Tailwind, Speech-to-Text.

- Developed an AI-powered developer assistant capable of code analysis, and voice-based queries.
- Added speech features enabling hands-free AI workflows and developer productivity boosts.

Link: <https://druva-ai-developer-assistant.vercel.app/>

SOCA – AI Smart Optimized Code Auditor

Tech: React, TypeScript, Tailwind.

- Created AI code reviewer with automated feedback, debugging tips, and challenge mode.
- Built a fast, gamified interface improving developer engagement and code quality.

Link: <https://soca-ai-driven-code-review-assistan.vercel.app/>

MediBot – AI Health Assistant and Medical Diagnosis System

Tech: React, TypeScript, OCR, RAG, Voice Input.

- Developed AI health assistant for symptom triage, preventive care, and medical search.
- Added multilingual voice input and image/doc parsing for accessible health interactions.

Link: <https://medi-bot-rust.vercel.app/>

Crezia – AI Text-to-Image Generator

Tech: React, TypeScript, Vite, Tailwind, Gemini, Hugging Face.

- Built real-time text-to-image generator with custom styles, ratios, and fast rendering.
- Delivered a modern, responsive UI optimized for speed and smooth user interaction.

Link: <https://crezia-ai-text-image-generator.vercel.app/>

Truva – AI Customer Support Copilot

Tech: React, TypeScript, Tailwind.

- Engineered AI support assistant with memory, insights, and adaptive conversation flows.
- Developed a responsive PWA delivering smooth mobile and web support interactions.

Link: <https://truva-ai-assistant-customer-support.vercel.app/>

CERTIFICATIONS

- Microsoft Azure – Cloud Services & AI Development.
- AWS Certified Developer – Associate.
- TensorFlow Developer Certificate – Google.

ACHIEVEMENTS

- Winner – Zero Boundaries Hackathon for innovative AI solution development.
- Co-authored research paper on IoT–ML integration.
- Cricket Champion – SKIT Premiere League (Team Leadership & Performance).
- Content Creator with proven audience engagement in entertainment domain.
